

REMARKS

A. Background

Claims 1-23 were pending in the application at the time of the Office Action. The Office Action rejected claims 1-9, 11-21, and 23 as being obvious over cited prior art. Claim 23 was also objected to as being a system claim that depended from a method claim. Claims 10 and 22 were objected to as being dependent upon a rejected base claim. By this response applicant has amended claims 1, 2, 4, 11-18, 20, and 22-23. As such, claims 1-23 are again presented for the Examiner's consideration in light of the following remarks.

Initially, applicant would like to thank the examiner for the courtesy of the telephone interview conducted on April 4, 2005. The purpose of the interview was to clarify the Examiner's position as to why independent claims 1 and 13 were rejected over the prior art and why the prior response was not considered sufficient to overcome the prior rejections. The Examiner stated that in his opinion, both the mobile terminal and the access point of the Sturniolo reference read on the claimed "wireless communication station." He further asserted that when the Sturniolo reference is viewed from the perspective that the access point is the wireless communication station that receives the packet data from the mobile terminal, the combination of Sturniolo and Eng read on claims 1 and 13. The Examiner agreed, however, that if claims 1 and 13 were amended to recite a "wireless mobile communication station" (instead of a "wireless communication station") that this would distinguish the claims over the cited prior art. The Examiner also agreed that such an amendment would be supported by the application as originally filed. No formal agreement was reached with the Examiner.

B. Proposed Claim Amendments

By this response applicant has amended claims 1, 2, 4, 11-18, 20, and 22-23. These claims have been amended to clarify that any reference to a “wireless communication station” is directed towards a “wireless mobile communication station.” These amendments are supported by the specification as originally filed. In view of the foregoing, applicant submits that the amendments to the claims do not introduce new matter and entry thereof is respectfully requested.

C. Rejection on the Merits

Paragraph 1 of the Office Action objected to claim 23 as being a system claim that depended from a method claim, *i.e.*, method claim 13. Applicant has herein amended claim 23 to remove the dependency on claim 13. As such, Applicant respectfully requests that the objection with respect to claim 23 be withdrawn.

Paragraphs 2-5 of the Office Action rejected claims 1-9, 11-21, and 23 under 35 U.S.C. §103(a) as being unpatentable over U.S. Patent No. 6,154,461 to Sturniolo et al., in view of a number of other patent references. Applicants have herein amended the claims to replace all references of “wireless communication station” with “wireless mobile communication station.” As discussed above with regard to the telephone interview conducted with the Examiner, the Examiner agreed during the interview that such amendments to the claims would distinguish the claims over the cited prior art. As such, in view of the claim amendments, applicant respectfully requests that the claim rejections be withdrawn.

Paragraph 7 of the Office Action requested that Applicant resend a copy of the Hoff, Meyer, and Cai references listed as items 20-22 of the IDS submitted 09/20/2004. Accordingly, attached at Exhibit A are complete copies of the requested references and a copy of the Form PTO-1449 that

was filed concurrently with the original submission of the references. Applicant respectfully requests that the Examiner initial consideration of the above requested references on the Form PTO-1449 and return a copy to applicant.

Paragraph 8 of the Office Action objected to claims 10 and 22 as being dependent upon rejected base claims, but stated that they would be allowable if rewritten in independent form including all of the limitations of the base claims and any intervening claims. Since the claims from which claim 10 and 22 depend are distinguishable over the cited prior art for at least the reasons as set forth above, applicant submits that claims 10 and 22 are now in condition for allowance.

No other objections or rejections are set forth in the Office Action.

D. Conclusion

Applicant notes that this response does not discuss every reason why the claims of the present application are distinguished over the cited prior art. Applicant has merely submitted those arguments which it considers sufficient to distinguish the claims over the cited prior art.

In view of the foregoing, applicant respectfully requests the Examiner's reconsideration and allowance of claims 1-23 as amended and presented herein. In the event there remains any impediment to allowance of the claims which could be clarified in a telephonic interview, the Examiner is respectfully requested to initiate such an interview with the undersigned.

Dated this 22 day of April 2005.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Dana L. Tangren", followed by a horizontal line.
